(The Monroe Institute Bulletin, Fall 1985)

QUARTERLY EXPLORER TAPE

Origins of Man

This quarter's Explorer tape excerpt is a fascinating account of the physical and non-physical origins of Man. Explorer, HAP, is proficient in the process of direct reporting from an expanded state of awareness. While exploring, HAP often visits the "Library"—a non-physical reference section in which information is contained on beams of light. In this session, he is directed to look under the heading: "*Man, Human, Earth—The Beginning*."
